

CLANDESTINE LABORATORY INVESTIGATING CHEMISTS ASSOCIATION

Instructions for Employment Re-Verification

It has come to the attention of the Membership Committee you have recently changed employers or have changed position descriptions.

Please read the Constitution and Bylaws, **especially Chapter 1 of the Bylaws** which details the different classes of membership offered by the Association. Regular membership in the Clandestine Laboratory Investigating Chemists Association requires an active role in the chemical analysis of clandestine laboratory evidence, clandestine laboratory scene response and investigation, and/or regularly responsible for the identification of controlled substances that may be the result of clandestine production, and is currently subject to testifying in courts of law as a result of such activity; or is the manager of such a scientist(s), either directly or indirectly.

Please self-evaluate if your employment qualifies you for your current membership level and provide supporting documentation, such as your CV documenting current duties and training received.

Complete the attached form, sign it, have your employer sign it and email it to the Membership Secretary. If you are trying to maintain Regular membership and your CV does not include a description of current clan lab duties, please include additional documentation such as approval by your agency to perform clan lab analysis. Failure to provide an Employment Verification form and supporting documentation for your current position may result in the termination of your membership with the Association.

For more information, please contact:
